DETAILED ACTION

1. This Office action responds to papers filed on 10 June 2010.
2. Claims 1-56 are pending and presented for examination.
3. Applicant's submission of references on form PTO-1449, filed on June 10, 2010, has been reviewed but the Japanese Office action for Japanese Patent Application No. 2004-021632 has not been considered. The document as presented is in a foreign language and no translation has been provided. A signed copy of the form is attached.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Raheja on Monday, June 28, 2010.

5. The application has been amended as follows:

Claim 47: delete "outputting to outside" in line 7 and insert after "for" --
transmitting --;
delete "by" in line 8 and insert -- from --;

in line 8 after “means”, insert – to outside of the production design verification device”.

Cancel claims 55 and 56.

Allowable Subject Matter

6. Claims 1-54 are allowed.

7. The following is an examiner’s statement of reasons for allowance:

While the reference of prior art by Nousch et al. in “*CAD on the World Wide Web: Virtual Assembly of Furniture with BEAVER*” teaches of a program which enables a user to modify closet design by direct interaction with a visualized three dimensional model, the patented invention of Miyakawa et al. (USPN 5,717,598) teaches of a designed object workability system the enables quantitative evaluation for comparison purposes, and the published application of Lilly et al. (Pub. No. US 2005/0149219 A1) teaches of a computerized system that provides scheduling of a plurality of work orders in a manufacturing process, none of these references taken either alone or in combination with the prior arts of record disclose a facility for supporting a production design capable of performing a production design of a prescribed product formed by assembling a prescribed component present in a real space by displaying the component in a virtual space, specifically including:

(claims 1 and 46) “... cooperation management means for associating assembly procedure data showing combination of the assembly enabled components and assembling order thereof with data for each of the plurality of

Art Unit: 2123

component objects so that each of the component objects are configured for display in the virtual space, said cooperation management means managing the component objects ... coordinate data acquisition means for acquiring coordinate data of each of the component objects arranged within the virtual space based on the received input from the user and displaying each of the component objects in the virtual space by the object display means and element working time output means for outputting an element working time required for an assembly of one component object with other component object in the working space on the basis of a distance between these component objects arranged within the virtual space, said distance is computed from the acquired coordinate data, and assembly procedure data related to the objects and cooperatively managed by the cooperation means”.

It is for these reasons that the Applicant’s invention defines over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
